

Our safety record was recognized by the National Safety Committee of the Associated Builders and Contractors when they gave us their STEP Award.

It recognizes a contractor's achievement and ongoing effort. The Rees Companies achieved the award's Gold level.

Rees Companies also received the ABC Excellence in Construction Award and was named an Accredited Quality Contractor for demonstrating commitment to excellence in safety, training, employee benefits, and community relations.

Every time

Not only do we do the big jobs, but we do them cost effectively and without sacrificing quality or safety.

We believe our customers come to us because they can rely on our commitment to service and quality — every time, on every job.

Our customers know that every component of a Rees Companies job is treated with the professional skill that ensures even the most complex operations run smoothly. Every job is important to us, regardless of its size.

And they're done on schedule.

Everywhere

Our headquarters are in southeastern Pennsylvania, but we service a wide variety of clients across the United States and Mexico. Wherever you need us, we'll be there.

It doesn't matter where the job is, we can do it.

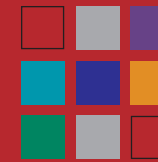

Every customer is an important customer.

Every job Every time Everywhere

Full-service capabilities for all phases of heavy industrial, mechanical, and electrical contracting — at their very best.

Every job

Most contractors are skilled in only one specialty. They may be competent in pipe fitting, rigging, or designing electrical panels that meet requirements. The Rees Companies can perform all aspects of a job, no matter how complex—and do them right. Turnkey operations are our specialty. It's what makes us unique.

The Rees Companies can handle the total job — not just a part of it.

No job is too large or too small for our experienced field crew and in-house fabrication facility. Our expertise, open labor shop, and equipment allow us to complete the total job. By bringing together top-flight management and skilled craftsmen, we can tackle any type of heavy industrial work—always focusing on safety and efficiency. That's why we've managed the most complex assignments. We have designed, installed, and serviced complex electrical systems. We've built every type of panel — relay process, computer-driven, and process instrumentation. Our fabrication shop can handle any job from electrical/mechanical skid systems to ASME code work.

Whether it's rigging up to 200 tons or installing dust collectors, oxidizers, or ASME certified carbon or stainless steel piping systems, we can do it. And we approach each job determined to meet the challenges of organization, project management, quality control, and cost efficiency.

CAPABILITIES

The Rees Companies' vision is to provide heavy industrial, mechanical, piping, and electrical contracting and equipment installation, plant maintenance, and fabrication at its best. With more than 80 years of combined experience, we know how to get the job done.

Mechanical

- Millwright work
- Alignment and leveling
- Machinery set-ups and repairs
- Equipment installation
- Equipment relocations
- Environmental projects
- Turnkey relocations

Electrical

- Substation installation
- Transformer installation
- Building conversions
- Process control wiring
- Distribution systems
- Programmable logic control (PLC) - build, install, and repair
- Heavy high-voltage wiring (install and repair)

Rigging

- Heavy equipment
- Conveying equipment
- Precision machinery
- Bag-houses
- Scrubber installations
- Bins, tanks, crushing
- Furnaces
- Experience with up to 200 tons

Piping

- Process piping systems
- Field and shop fabrication (C, SS, copper, and special alloys)
- Hydraulic systems
- ASME certified welding
- Product conveyance

Fabrication

- Pilot plants
- Industrial skid systems
- Mechanical skid systems
- Pipe fabrication
- Industrial structural steel welding
- Process duct systems
- Material handling systems
- Specialty fabrication
- Conveyors
- Stainless aluminum
- Structural steel

Panel building

- Relay process panels

- PCL panels
- Computer-driven panels
- Panel design
- Process instrumentation panels

Welding

- Piping systems
- Structural steel
- Bridge cranes
- Structural applications
